

DIGITAL SYNERGY

Imagine a solution where **you**, the dentist, have access to several avenues of 3D technology simply by using an intra-oral scanner.

Bring aligners, sleep medicine, 3D printing and milling, mouth guards and so much more back into your practice and into your revenue!

Aligners

Clear Comfort Aligners is a system that won't compete with you, easy to implement & provides great results and brilliant smiles all under your supervision and control.

Sleep Medicine

Sleep Medicine has never been so accessible. From Awaken2Sleep to Phillips Alice OneNight, you can easily integrate sleep medicine into your practice.

3D Printing & Milling

3D printing & milling are game-changing processes that can benefit dental practices beyond the creation of strong, beautiful, and affordable final restorations.

Mouth Guards

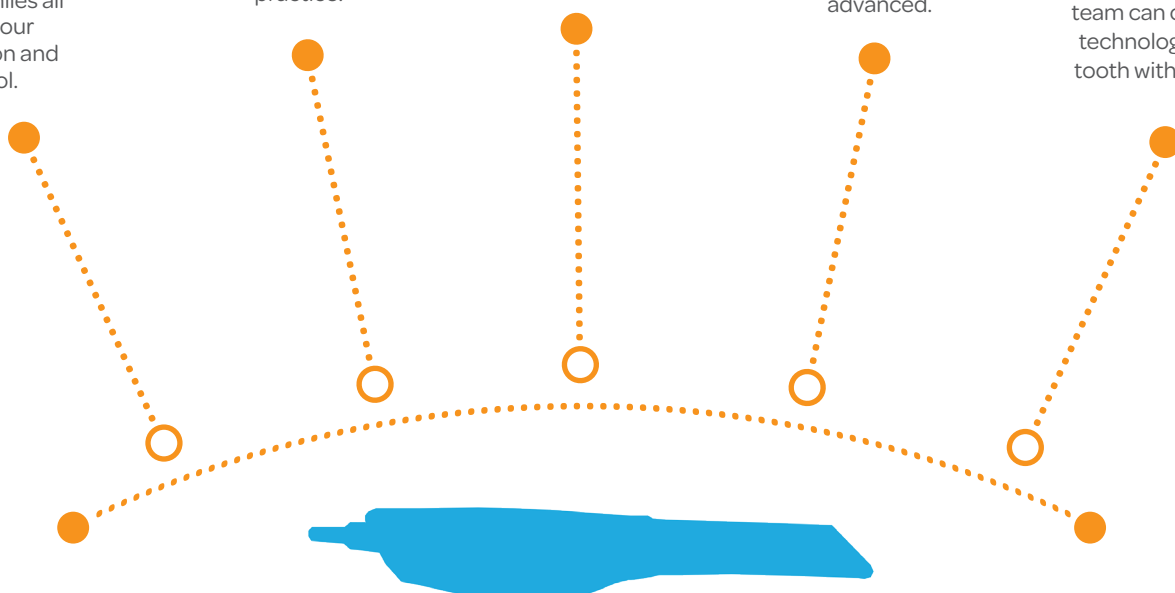

Change the way your patients protect their teeth. GuardLab uses 3D technology & printing to create premium products that are accurate, comfortable and the most scientifically advanced.

Digital Dentistry

A patient should no longer hesitate to restore a tooth after experiencing damage or decay. With digital dentistry, your dental team can offer the latest technology to restore a tooth with only one visit.

Intra-Oral Scanner
